YOUR COMPLETE OSHA RESPIRATORY COMPLIANCE CHECKLIST

1 Written Respiratory Protection Program

- ☐ Develop a documented program tailored to your workplace hazards.
- ☐ Assign a program administrator to oversee implementation.

2 Hazard Assessments

- ☐ Identify potential respiratory hazards in the workplace.
- ☐ Conduct proactive assessments for new processes or materials.

3 Respirator Selection

- ☐ Ensure respirators are NIOSH-certified and appropriate for the identified hazards.
- ☐ Consider voluntary vs. mandatory respirator use and document decisions accordingly.

4 Medical Evaluations

- ☐ Provide medical evaluations to employees before respirator use.
- ☐ Use an online or onsite medical clearance solution, such as [RespiratorClearance](#).

5 Fit Testing

- ☐ Perform quantitative or qualitative fit tests for all tight-fitting respirators.
- ☐ Re-test annually or when changes in facial structure occur.

6 Training

- ☐ Train employees on the proper use, limitations, and care of their respirators.
- ☐ Provide retraining annually or as needed.

7 Maintenance and Storage

- ☐ Establish procedures for cleaning and inspecting respirators.
- ☐ Store respirators in a clean, dry area away from contaminants.

8 Program Evaluation

- ☐ Conduct regular audits of your respiratory protection program.
- ☐ Update the program as workplace conditions or regulations change.

Bonus Tips for Streamlined Compliance

- Leverage online tools to simplify medical clearance and training documentation.
- Stay updated on OSHA regulations and industry best practices.

About RespiratorClearance

[RespiratorClearance](#) specializes in fast, OSHA-compliant online medical clearance and fit-testing solutions tailored for industrial training companies. Streamline your respiratory protection programs with our efficient and secure platform.
